Coverbase

— THE COVERBASE PLATFORM

Agentic Third-Party Risk & Security

AI-driven end-to-end TPRM

Built for modern enterprises.

Coverbase orchestrates vendor sourcing, intake, assessment, contracts, and continuous monitoring through one platform - every step of the way automated end-to-end by purpose-built AI agents.

— PLATFORM MODULES

01 · WORKFLOW AUTOPILOT

The Orchestration Engine

02 · INTAKE

Autonomous Intake

Vendor requests are researched, risk scored, and prequalified before a human sees it. AI pulls from public sources and internal systems, catching duplicates and anomalies automatically.

03 · RISK ASSESSMENT

Assessment Co-Pilot

Validates vendor evidence against your custom controls across InfoSec, privacy, legal, finance, compliance and IT. Returns a provisional assessment in minutes.

04 · CONTRACTS

Contract Guardian

Transforms every vendor contract into a living intelligence hub. Extracts obligations, SLAs, and renewal terms; flags unusual clauses.

05 · CONTINUOUS MONITORING

Supplier Radar

Continuous third-party risk monitoring that fuses internal data with external intelligence across all risk domains. Customize alerts to surface real risk while reducing noise.

06 · FINDINGS

Findings Manager

Intelligence layer on top of issues across all assessments. Tracks remediation outcomes and surfaces systemic risk patterns.

07 · OBLIGATIONS

Obligations Tracker

Tracks obligations for your organization when engaging third parties. CUECs, legal terms, SOW duties, and technical controls.

08 · RFPs

RFP Platform

Complete RFP platform purpose-built for regulated industries. Risk, compliance, security, and legal evaluation embedded into selection.

09 · SAAS SECURITY

Agentic Inspect

Monitoring and discovery of SaaS applications. Track access patterns, SLA performance, and behavioral anomalies in critical software.

10 · FOURTH-PARTY

Fourth-Party Monitoring

Extends visibility beyond your direct vendors to the sub-processors, cloud infrastructure, and technology dependencies they rely on - closing the supply-chain blind spot.
